

Volcanoes Vocabulary Matching Game

Match the word to its definition by writing the correct word in the box.

	Hot, molten rock beneath the Earth's crust which forms lava.		The cloud of ash formed above the volcano from the force of the volcanic explosion.
	A pool of magma or liquid rock, beneath the surface of the Earth.		Hot, molten rock which emerges from underground magma.
	The primary opening of the volcano through which the magma and other rocks and gases flow out.		The act of a volcano erupting.
	The mouth of the volcano which surrounds the vent.		A volcano that is erupting or one which may erupt.
	A volcano which is temporarily inactive.		A volcano that has not erupted for a significantly long period time and is not expected to erupt again.
	The residue that remains after something has burned.		The scattered remains of something that has been broken, discarded or destroyed.

active	dormant	extinct	ash cloud	magma	lava
crater	main vent	ash	eruption	chamber	debris

For a fantastic work of fiction based on volcanoes, download the Twinkl Originals short story 'The Pack of Pompeii' [here](#). Follow a trio of mountain dogs as they attempt to flee the devastating eruption of Mount Vesuvius in AD79, which destroyed the Roman city of Pompeii.

Volcanoes Vocabulary Matching Game Answers

Match the word to its definition by writing the correct word in the box.

magma	Hot, molten rock beneath the Earth's crust which forms lava.	ash cloud	The cloud of ash formed above the volcano from the force of the volcanic explosion.
chamber	A pool of magma or liquid rock, beneath the surface of the Earth.	lava	Hot, molten rock which emerges from underground magma.
main vent	The primary opening of the volcano through which the magma and other rocks and gases flow out.	eruption	The act of a volcano erupting.
crater	The mouth of the volcano which surrounds the vent.	active	A volcano that is erupting or one which may erupt.
dormant	A volcano which is temporarily inactive.	extinct	A volcano that has not erupted for a significantly long period time and is not expected to erupt again.
ash	The residue that remains after something has burned.	debris	The scattered remains of something that has been broken, discarded or destroyed.
