Session 3

Dare to take risks

Hello! You have reached Session 3 already! This is the last session with Matthew Syed helping us **before** we introduce you to the other Matthew – Matthew Burton! Gemma is here all the way through to encourage and guide you.

Matthew Syed

Gemma Oaten

In Session 2, we decided we wanted to have ...

by having a GROWTH MINDSET.

And when we ask this question...

the answer is often a FIXED MINDSET.

**We agreed that to be AWESOME, you need to be brave and not be afraid of fear.
You were going to think about what you could do to overcome a fixed mindset.**

Here is Matthew Syed, for one last time, to introduce today's session:

If you are reading 'You Are Awesome' alongside these sessions, then read from page 94 until the end. It doesn't matter if you don't read it all in one go because that is a BIG chunk of text!

*Have you ever
had a dream?*

It is good to have dreams
and goals in life...

Dream big and dare to fail. What does it mean?

Don't be too scared to try.

Take a chance.

Take a risk.

Be fearless.

What are your hopes and dreams for secondary school?

You will be there from when you're 11 to maybe 16 or 18 years old.

A lot will change in that time.

In your workbook, write down your thoughts about the following:

1. What do you hope you will achieve?
2. What kind of person do you hope you will become?
3. Write down three words that you hope people will say about you.

Are you scared of failure?

What are you worried about 'failing' in secondary school?

Some Year 6 students say that they are worried about some of the following:

- not making friends
- not being able to do the work
- that they won't know where to go.

Each one of us will be scared of failure at some point in our lives BUT sometimes fear stops us from doing things.

It can stop you from achieving your goals and dreams.

Why do we fear failure?

You don't want to feel stupid.

You don't want to be teased by others.

You don't want to disappoint yourself or others.

You don't want to be a 'loser'.

As you go to secondary school, you might worry about not getting things right.

I'm worried about not knowing what to do.

I am worried about getting lost.

I am worried about not doing well on tests.

I worry that I won't make friends.

I'm worried I am going to say or do the wrong thing.

Not all of these things would mean you had failed. You can always start again and keep trying. Everyone is there to help you!

How can you view failure differently?

- Start to see failure as an incredible learning experience.
- Learn a lesson each time you fail.
- Know that mistakes can help you grow and move forward.

Do you know where your learning actually happens?

Learning happens from hours of practice.

Serena Williams is a tennis player.

Serena started playing tennis when she was three years old and she played for two hours a day!

Serena loved tennis and it was her passion.

Over time, she made many mistakes but practised for thousands of hours.

Read page 104 of 'You Are Awesome' to find out more.

Where does learning actually happen?

It is all about the PRACTICE!

Mozart was a child prodigy and composer.

He started composing pieces for the violin and piano by the age of 6. He was a musical genius.

Mozart's father put him through hours of musical training from the age of 3! By the time Mozart was 6, he'd been put through 3,500 hours of practice.

Child prodigies are not just born with skill; they have to work and work at it!

Read more on page 104 of 'You Are Awesome'.

FAMOUS FAILURE

CHOKING SPECIAL!

Choking is when you are under pressure and are nervous, adrenalin is pumping through your veins and you suddenly find it hard to think straight or how to do things you have done so many times before.

RORY MCILROY is a famous golfer

RORY MCILROY

At the 2011 Masters – a hugely important golfing competition – McIlroy played a dazzling game. Leading the way for the majority of the tournament, he looked set to scoop a great victory. But then – the choke. In the last round, the pressure became too much to bear, and McIlroy's game collapsed. He missed or fumbled so many shots that not only did he lose his lead, he ended up finishing the whole tournament in 15th place, instead of first.

FAMOUS FAILURE

JAY-Z

As in the millions-of-records-sold, multiple-Grammy-award-winning rapper? The multimillionaire businessman? The man who even managed to marry **ACTUAL** Beyoncé? That Jay-Z?

Not only is Jay-Z one of the most successful musicians of all time, he also owns a record label, has numerous clothes lines, a drinks company, a tech company and his own music streaming service. And (I really don't think this can be said enough) he married Beyoncé!

IN WHAT PARALLEL UNIVERSE COULD HE POSSIBLY BE CONSIDERED TO HAVE FAILED?

Well. The music business can be tough to crack, as Jay-Z discovered when he first started out. The young hip-hop artist struggled to find a record label that would back him—no one would give him a break. But rather than give up, Jay-Z sold his CDs out of his car, before founding his own record label—and the rest is history. Not only did he create a launch pad for his own music, he also went on to become one of the world's most successful business visionaries, and responsible for the careers of stars including Rihanna. What a comeback!

“I will not lose, for even in defeat, there’s a valuable lesson learned, so it evens up for me...you learn more in failure than you ever do in success.”

Jay-Z

Sometimes we 'choke' in pressure situations

- **Choking** is the kind of failure that results from thinking too much.
- Choking can happen when you are in a pressured situation such as an exam or a sports match.
- For example, you might be so worried about how to get somewhere, you forget for a moment how to get there!

What happens if you panic under pressure? Here are some of Matthew's top tips.

1. Tell yourself how you feel is **NORMAL**.

Everyone gets anxious. Try to go for a walk around and shake your arms. This can help to burn off your adrenaline.

3. Don't overthink. Try to zone out from where you are and what you are doing and focus on the task itself so that you can be on auto pilot.

2. Focus on your breathing. Going from being fine to a state of anxiety can trigger you into a panic. Focusing on your breaths in and out can help you feel calm.

Read page 141 from 'You Are Awesome' to find out more.

What happens if you panic under pressure?

4. Put things into perspective.

Remember that life will continue, no matter how you do or what the outcome is. It is just a challenge and a learning opportunity. Just do your best.

6. Keep trying. Performing under pressure is a skill. The more you do it, the better you will get. Don't let a meltdown put you off or give up.

5. Do a ritual which calms you or focuses you. This could be listening to music, reading a quote, doing some breathing or visualising an outcome.

Read pages 142-143 'You Are Awesome' to find out more.

Don't be afraid to fail and here is how...

- Change your attitude about failing.
- Remember that we have to make mistakes to learn.
- Understand that some things in life are hard and take work.
- Keep a positive mind, even when you get setbacks.
- Try and try again.

**Think again about failure. That is how we learn.
It is how we become determined.**

**Think of something that didn't go quite as you had
expected: what did it teach you? Jot that down in
your workbook.**

Gemma knows the importance of not giving up and always trying again.

Remember to give **EVERYTHING** your best shot!
