I need to mix some cupcakes, but all of the ingredients are on the scales at the same time. The scale reads 760g.

I know the mass of the flour is as much as the sugar and butter together. What is the mass of the flour?

Challenge: The mass of sugar is $\frac{2}{5}$ the mass of the butter is $\frac{3}{5}$.
What is the mass of the sugar?

On this balance scale, is one exercise book heavier than one dictionary?

What is the mass of one exercise book compared to one dictionary? Record your answer as a fraction?

twinkl.com

The total mass of a bowl and ingredients for cupcakes is 246g. There is enough mixture to fill 7 equal cupcake cases. When 3 cupcake cases are filled, the mass of the bowl and ingredients is 225g.

What is the mass of the bowl?

I have to put backing paper on four display boards in school. If I cut a 3m roll of paper into 65cm lengths will I have enough for all 4 boards?

Do I have any paper left?
If so how much?

Record your answer in
m, cm and mm.

The school secretary is ordering supplies for KS2 classes. Fill in the missing items to scale the stock up or down.

Quantity	Pencils	Rubbers	Rulers	Books
5	50p			
10		20p		
50			£7.50	
75				£13.50

Answers

- Sugar - **275g**
Flour - **525g**
Sultanas - **325g**
- Mass of flour: **760g \div 2 = 380g.**
Challenge: **Sugar = $\frac{2}{5}$ of remaining mass so $380g \div 5 \times 2 = 152g$**
- 470g - **0.470kg**
3.25l - **3250ml**
500cm - **5.0m and 5000mm**
2.65kg - **2650g**
- Scale 1: **50g intervals**
Scale 2: **20g intervals**
Scale 3: **1kg intervals**
Scale 4: **250g intervals**
- 630g marked on scale. With an extra 90g it would read 720g.**
- Water: **1750ml or 1.75l.** Milk: **750ml or 0.75l.**
Total volume: **2500ml or 2.5l.**
- No, one exercise book is not heavier than one dictionary.

Each exercise book is equal to $\frac{1}{4}$ the mass of each dictionary.

- $246g - 225g = 21g$
 $21g \div 3 = 7g$ for each spoonful of cupcake mix
 $7g \times 7 = 49g$ of cupcake mix
 $246g - 49g = 197g$. **The bowl weighs 197g.**
- $65cm \times 4 = 260cm$. **Yes I have enough paper.**
There is 0.4m or, 40cm or, 400mm paper left.
